

How to Use Zerust® VCI Packaging

Correct

Incorrect

Pack only clean and dry parts.

Always wear clean and dry gloves when handling metal parts to protect them from corrosion causing fingerprints.

When packing, the temperature of the parts should be about the same as the room temperature to avoid condensed moisture.

Tightly close packages with tape, heat seal, zip ties or by folding over. Reseal after every use.

Insert additional Zerust materials as interleave for added protection in larger and tightly packed or layered packages.

Avoid direct contact of metal with wood, paper or cardboard (sources of moisture and acid).
